📍 Istanbul/Türkiye

ABOUT ME

I am a Software Developer who transitioned into the software industry after a career in engineering. I have been specializing in Frontend Development, honing my skills through the OnlyJs Software Academy. Leveraging system-oriented thinking and problem-solving abilities from my previous field, I am eager to grow in Backend technologies and become a well-rounded developer. I have full confidence in my ability to adapt to new systems and embrace continuous development to create impactful solutions. During my early university years, I hitchhiked across Turkey-exploring regions like Marmara, the Aegean, the Mediterranean, and parts of Central Anatolia. Since childhood, I've been deeply passionate about travel documentaries, and my biggest dream is to combine my career with my love for exploration: to live as a digital nomad, building impactful solutions while traveling the world.

STRENGTHS AND EXPERTISE

Languages: HTML, CSS, SASS, JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js, Passport.js, PostgreSQL, Prisma, ORM, and NestJS

Frameworks and Technologies: React, Git, GitHub, Vite, Bootstrap, Ant Design, CSS-in-JS libraries, Zustand, React Hook Form, NPM, Visual Studio Code, Cursor Ai, Perplexity Ai

Soft Skill: Problem Solving, Communication Skills, Teamwork, Adaptability and Learning Agility, Time Management and Organization

PROJECTS

Dev-Portfolio | [Code](#) | [Live View](#)

Technologies: Next.js, React, TypeScript, Tailwind, shadcn/ui (Radix), GraphQL, Netlify

- Features: Dynamic Next.js portfolio showcasing pinned and regular projects via GitHub GraphQL, with multilingual support, dark mode, optimized images, and a fully responsive UI.
- Technology & Design: Implemented with Next.js 15 (App Router), React 19, and TypeScript, using Tailwind/shadcn for accessible UI, a serverless GitHub GraphQL proxy, and SSG/SSR with image optimization for high performance and maintainability.

OJS Nutrition Monorepo | [Code](#) | [Live View](#)

Technologies: TypeScript, Turborepo, pnpm, Bun, Node, Elysia (REST), Prisma, PostgreSQL, React, Vite, TanStack Router, React Query, Zustand, Tailwind CSS, shadcn/ui, OpenAPI/Swagger

- OJS Nutrition – Monorepo is a production-ready e-commerce stack: an Elysia + Prisma REST API and a React/Vite web app, both sharing TypeScript schemas and a generated SDK for strict typing. Turborepo speeds up CI with caching and parallel tasks; the API covers auth, catalog, cart/checkout, and orders on PostgreSQL with JWT and email. The web uses TanStack Router, React Query, Zustand, and shadcn/ui with a responsive dark/light theme; one command runs both locally, and deploys target Bun/Node (API) and static hosting (web).

ControlHub-Admin Panel | [Code](#) | [Live View](#)

Technologies: TypeScript, Turborepo, Bun, React, Tailwind CSS, Radix UI/shadcn, TanStack Router/Query, React Hook Form, Zod, Node.js, Elysia.js, Prisma, PostgreSQL, Redis, JWT, OpenAPI/Swagger, i18next

- ControlHub is a modern admin management monorepo delivering a real-time, analytics-driven dashboard with robust user/auth management and internationalization. The backend uses Elysia.js with Prisma/PostgreSQL, Redis caching, JWT security, and OpenAPI docs, while the frontend is built with React 19, TanStack Router/Query, Tailwind + Radix/shadcn, and React Hook Form + Zod for safe forms. Turborepo coordinates shared packages (type-safe eden client, DB schema, tsconfig) and Bun-powered scripts, enabling single-command local dev and predictable production builds.

Royal's Group | [Code](#) | [Live View](#)

Technologies: React, SCSS, Typescript

- Modern Tech Stack: Built from scratch using React, TypeScript, and SCSS for a user-friendly and visually appealing website.
- Component-Based Architecture: Ensures type safety, dynamic styling, and attention to design details.
- Optimized User Experience: Features responsive design and performance optimization for seamless usability across devices.

WORK EXPERIENCE

OnlyJs Academy Freelance | Software Developer

April 2025 – Current

- I work on a project-based basis in the freelance software team of the company I am trained in.
- The projects I work with may be shown in private, as per their privacy policies

Skills: Fullstack Development, Software Web Development

OnlyJS Academy | Tech Content Editor

Jan 2025 – Current

- I am responsible for preparing and editing blogs, articles, and content materials for OnlyJS Academy.
- With great motivation, I strive to create valuable content for the tech world while staying up-to-date and aligned with current trends through continuous research in technology and software development.

Skills:Deadline Oriented, Text Editing, Research

Freelance | Fullstack Web Developer

September 2024 – Current

- A full-scale solution for Royal's Group using React, TypeScript, and SCSS with a user-focused design.
- Continues working on freelance frontend projects and receiving job offers in the field.

Skills:Management and Organization, Problem Solving, Javascript, Typescript, React

OnlyJS Academy | Assistant Mentor

August 2024 – Current

- Mentor Assistant at OnlyJS, supporting the community alongside my Frontend Developer journey.
- Manage follow-up tasks and host live broadcasts on personal development.
- Share industry insights to enhance the knowledge network and foster collaboration.

Skills:Deadline Oriented ,Management and Organization, Problem Solving, Community Development

Hilal Aluminum | Quality Control Engineer

September 2023 – February 2024

- Oversaw quality control, data organization, testing, and painting process planning for aluminum profiles, while managing and reporting process controls.

Skills:Analytical Skills, Quality Control, SolidWorks, AutoCad, Engineering, Teamwork

EDUCATION

OnlyJS Academy | Fullstack Development Trainee

June 2024- April 2025

- I gained proficiency in web development technologies like HTML, CSS, **Bootstrap, SASS, JavaScript, Vite, React, Zustand, React Hook Form, TypeScript, Cursor Ai and Purplexity Ai** at OnlyJs Academy.
- Currently, I am learning backend technologies including **Node.js, Express.js, Passport.js, PostgreSQL, Prisma ORM, and NestJS** to enhance my fullstack development skills.

Classes:HTML, CSS, Bootstrap, SASS, JavaScript, Vite, React, CSS-in-JS, Zustand, React Hook Form, NPM, Cursor Ai, TypeScript, Node.js, Express.js, Passport.js, PostgreSQL, Prisma ORM, NestJS

Namık Kemal University | Biosystem Engineer

Sep 2017 - Jan 2023

Classes:Engineering, Analytical Skills, Biosystem, Smart Agriculture, Renewable Energy Systems

LANGUAGES

- Turkish (Native) ,
 - English (reading/writing/research),(Intermediate B1-B2)
-
